EXPERIENCE

OpenCampus (Animoca Brands)

Remote / Australia

Product Lead / Technical Product Manager

Jul 2024 – Present

- Owned a portfolio of student-facing, partner-facing, and infrastructure products spanning digital credentials, identity, incentives, ecosystem tooling, and blockchain infrastructure.
- Led product planning and cross-functional delivery for government-scale digital credential infrastructure, including the tokenisation of 10M digital credentials for students in India.
- Responsible for product strategy, PRDs, user flows, API assumptions, technical requirements, engineering sprint planning, analytics, launch planning, and operational runbooks.
- Acted as a hands-on technical PM, implementing internal tooling and prototypes using Python, APIs, and blockchain data to unblock engineering decisions and support delivery.
- Served as product owner for blockchain infrastructure operations, including vendor evaluation, RPC/indexing requirements, bridge UX, multisig workflows, and migration/deprecation planning.

AgentFi

Remote

Head of Product & Partnerships

Jan 2023 – Jul 2024

- Led product strategy, technical specifications, go-to-market execution, and protocol partnerships for an AI/Web3 DeFi product.
- Ran user acquisition and marketing campaigns, including an oversubscribed NFT mint that raised approximately US\$200k.
- Helped grow product TVL to more than US\$2M and coordinated delivery across product, engineering, marketing, and partner teams.

Tracer DAO / Mycelium

Brisbane, Australia

Financial Engineering Lead / Product Lead

Aug 2020 – Nov 2022

- Co-designed Tracer Perpetual Pools v1/v2 and Tracer Perpetual Swaps, combining derivatives design, liquidity mechanics, AMM behaviour, and product execution.
- Helped scale Tracer Perpetual Pools to more than US\$700M in trading volume and co-owned protocol tokenomics across liquidity mining, auctions, and treasury allocation.
- Managed a team of five during major market volatility and company growth, and worked with VC firms, market makers, and proprietary trading firms on fundraising, liquidity, and statistical arbitrage strategies.

University of Queensland

Brisbane, Australia

Research Assistant / Casual Academic

2019 – 2020

- Co-authored research on corporate climate-transition risk and taught introductory finance and financial modelling, including practical R and Python coursework.

Flight Centre

Brisbane, Australia

Commercial Analyst

2016 – 2018

- Worked as a pricing analyst for an online travel business and contributed to revenue growth from approximately A\$100k/day to A\$1M/day.

EDUCATION

University of Queensland

Brisbane, Australia

Bachelor of Advanced Finance and Economics (Honours)

2016 – 2019

- Honours project: A review of the ESG literature and its effect on alpha.
